Investment policy

OP-Private Equity Strategy is an equity fund which invests its assets broadly in the global equity market. The Fund's investments are mainly based on investments in the units of other mutual funds, non-UCITS or UCITS (Underlying Investee Funds). The equity-linked instruments' share of the Fund's value may range between 80 and 105%. The Fund may also make minor investments in alternative vehicles (e.g. real estate funds, commodity mutual funds and absolute return funds). In its investment operations, the fund may use derivative instruments in order to hedge against the risk of adverse market movements, to replace direct investments and to promote otherwise effective portfolio management. The Fund diversifies its equity investments on a broad basis among various companies, since they are mainly implemented using funds. The fund is a AIF fund, based on the Alternative Investment Fund Managers Directive, since it may invest in vehicles not available to funds under the UCITS Directive.

Responsibility

Responsible investing

Exclusion

The fund follows [OP Asset Management's principles for responsible investment](#). The consideration of responsibility in the investment analysis and decision making provides additional information in addition to the traditional financial and market information. The significant aspects of responsibility can in the long run affect the financial success of the investment objects and thus the return.

Active ownership

The fund excludes from its active, direct investments manufacturers of controversial weapons, mining companies that produce coal, electricity companies that use charcoal and companies that have violated international standards, and which have not been susceptible to impact. [The list of excluded investment items](#) is public.

Violation of international standards

OP's funds participate in domestic and foreign general meetings in accordance with [OP Fund Management Co's Ownership Policy](#), which takes responsibility into account. All in all, OP's funds participate annually in more than one thousand general meetings. OP Funds utilize the Annual General Meetings Institutional Shareholder Services Annual General Meeting analysis.

International standards, such as the UN Global Compact, set the minimum level of responsible business operations. OP Asset Management affects through OP funds that make active, direct investments such companies that are considered to have violated international standards. The goal is to get companies that have violated the standards to change their business and start to comply with the international standards in their business. We use the company Sustainalytics as a service provider to identify violations of international standards.

Thematic impact

OP Asset Management also affects companies through various themes of responsibility, such as issues related to climate change.

Read more about the OP Funds' practical ownership influence in [the overview of responsible investment](#) that is published twice a year.

ESG analysis

ESG-rating

A

Carbon intensity 128,5 Green revenues 5,4 %

greenhouse gas emissions in tonnes / turnover (\$M)

Total ESG score	6,5
Environment (E)	6,4
Social (S)	5,1
Governance (G)	4,9

Coverage 94,4 %

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

Renewable energy 1,5 %

Energy efficiency 2,8 %

Environmentally friendly construction 0,5 %

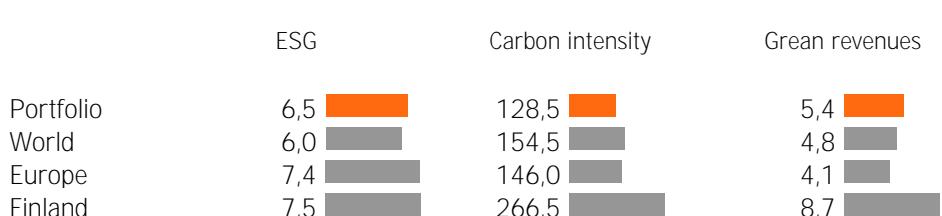

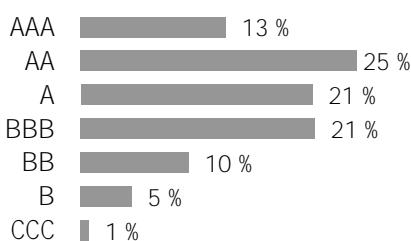

Sustainable use of water resources 0,2 %

Prevention of pollution 0,2 %

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

Companies' ESG classification

The portfolio's ESG analysis in relation to reference portfolios

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak

The purpose of the monthly report is to provide its readers with information on the funds and their performance.
