Investment policy

OP-Private Strategy 25 is a balanced fund which mainly invests its assets in international equity and bond markets. In the basic allocation, the fund invests 25% of its assets in equity and 75% in fixed income. The Fund's investments in fixed-income instruments may account for 90–60% of the Fund's value and those in equity-linked instruments for 10–40%. The Fund's interest-rate risk exposure may be a maximum of 10, measured by modified duration. The Fund may also make minor investments in alternative vehicles (e.g. real estate funds, commodity mutual funds and absolute return funds). The Fund makes investments mainly through other mutual funds. In its investment operations, the fund may use derivative instruments in order to hedge against the risk of adverse market movements, to replace direct investments and to promote otherwise effective portfolio management. Derivatives are chiefly used to manage equity and interest rate risks. The Fund diversifies its equity investments on a broad basis among various companies and bonds, since they are mainly implemented using funds. The Fund is a non-UCITS fund, as referred to in the Act on Common Funds, since it may invest in vehicles not available to funds under the UCITS Directive.

Responsibility

Responsible investing

The fund follows [OP Asset Management's principles for responsible investment](#). The consideration of responsibility in the investment analysis and decision making provides additional information in addition to the traditional financial and market information. The significant aspects of responsibility can in the long run affect the financial success of the investment objects and thus the return.

Read more about the OP Funds' practical ownership influence in [the overview of responsible investment](#) that is published twice a year.

ESG analysis

ESG-rating	A	Carbon intensity	151,4	Green revenues	4,5 %
		greenhouse gas emissions in tonnes / turnover (\$M)			
Total ESG score	6,3			Renewable energy	1,1 %
Environment (E)	6,6			Energy efficiency	2,1 %
Social (S)	4,9			Environmentally friendly construction	0,7 %
Governance (G)	4,8	Coverage	64,2 %	Sustainable use of water resources	0,2 %
				Prevention of pollution	0,2 %

The ESG score indicates how well the portfolio's target companies take into account risks and opportunities related to the environment, social aspects and good governance in relation to their industry. The score scale is 0-10. After that, the score is divided into 7 classes. The higher the score, the better the portfolio companies have prepared for the risks and opportunities associated with ESG.

The portfolio's carbon intensity is the weighted average of the portfolio companies' carbon dioxide intensity. The carbon footprint takes into account companies' greenhouse gas emissions in tonnes at level 1 and level 2 in relation to the company's turnover (million dollars).

The portfolio's green revenues examines how the portfolio companies' products and services have an impact on the environment. The number describes the proportion of products and services with a positive environmental impact on portfolio companies' turnover.

Companies' ESG classification

The portfolio's ESG analysis in relation to reference portfolios

	ESG	Carbon intensity	Green revenues
Portfolio	6,3	151,4	4,5
World	6,0	154,5	4,8
Europe	7,4	146,0	4,1
Finland	7,5	266,5	8,7

AAA = excellent, AA = very good, A = good, BBB = average, BB = satisfied, B = weak, CCC = very weak

The purpose of the monthly report is to provide its readers with information on the funds and their performance. Information provided in the report is no investment advice and no investment decisions should be made based on such information. The Key Investor Information Document for investors and the fund prospectus as well as the fund's annual report and half-yearly report are the documents that investors should read before making any subscription for fund units.
